

Ana Santana

Customer Enablement · Voice of Customer · Onboarding & Community

Bilingual English / Spanish · evidence-driven · applied AI

Boston, MA · Open to Remote 617-652-6919 santana.ana.333@protonmail.com

Bilingual enablement and Voice-of-Customer professional with 8 years turning scattered customer feedback and product-usage data into owned, decision-ready signal. I build onboarding and training systems, run VOC and community programs, and design the connective tissue between customers, support, and product — then prove the loop closed. I build AI into how the work runs — automating the labor, never the judgment.

EXPERIENCE

Stratus — GTP Services

2025 – 2026

Customer Engagement Manager · Product Specialist

- Built the Voice-of-Customer function into the connective layer between customers, support, and product — turning scattered feedback into owned, prioritized signal leadership could act on, and closing the loop back to the customer.
- Ran Voice-of-Customer programs (advisory boards, community, focus groups, surveys), defining cadence and format so customer input was consistent and actionable.
- Synthesized feedback and product-usage data (Amplitude) into evidence-backed, prioritized summaries that gave product leadership a clear view of where to focus; influenced NPS, CSAT, retention, and expansion.
- Built a multi-channel engagement calendar (email, webinars) driving adoption of customer-shaped product updates; performed manual QA across iOS, Android, web, and desktop and authored release notes and knowledge-base docs with AI workflows I designed.

Founder — Independent Venture

2025

Customer Insight & Data Methodology

- Developed an evidence-based methodology for separating trustworthy, decision-grade information from conflicting or low-quality data sources.
- Ran competitive and market research to define positioning and target segments; built identity and go-to-market materials structured into a documented framework.

Autodesk

2020 – 2025

Team Lead · Product Support Representative

- Led a training and onboarding project (documented in Asana) that reduced onboarding time by 30% and brought new hires to proficiency within their first month.
- As the team's first lead, directly led ~10 associates and mentored across a 45-person rotation, improving performance metrics by 20%; designed standardized, data-driven training that lifted readiness by 15%.
- Managed escalated cases, cutting escalation volume by 15%; sustained CSAT and first-touch rates above 93% against a 90% goal while handling 40+ cases daily. Scalability Award winner for standardizing best-practice playbooks.

LevelUp / GrubHub

2018 – 2020

Senior Technical Support Engineer · Enterprise Product Support Specialist

- Delivered bilingual (EN/ES) technical support across 50 mobile applications for merchant partners — including VIP clients Google, Yelp, and Chase Pay — and authored self-service guides that reduced support requests.

EDUCATION

Doctor of Medicine Program · Universidad Iberoamericana (UNIBE)

Santo Domingo, Dominican Republic — clinical coursework and hospital rotations.

The training behind how I work: evidence first, precise under pressure.

SKILLS

ENABLEMENT	Onboarding & Training Systems · Knowledge Base Development · Team Leadership & Mentoring · Cross-Functional Collaboration
